Professional Summary

Motivated Computer Engineering student and Full-Stack Developer with a strong command of the MERN stack, Next.js 14, and TypeScript. Passionate about building scalable, production-ready web applications and exploring GenAI integration. Proven experience in architecting real-time systems, optimizing backend performance, and creating responsive, high-fidelity frontends.

Technical Skills

Frontend Development: Next.js 14, React 19, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, Zustand, Framer Motion

Backend Development: Node.js, Express.js (MERN), Python, WebSockets (Socket.IO), Google OAuth2, REST APIs

Database & Cloud: MongoDB Atlas, Convex, Redis (Upstash), Sanity CMS, Google Cloud, Cloudinary

AI & Integrations: Gemini API (Google Vertex AI), LiveKit, OpenAI

Tools & DevOps: AWS, Git, GitHub, Docker, Postman, Vercel Deployment

Professional Experience

LaunchPit

March 2026 – April 2026

Full-Stack Engineering Intern

Pune, Maharashtra

- Engineered the end-to-end full-stack architecture for HeightComparisonCalculator.com, scaling a high-performance interactive 2D/3D visualization engine.
- Built a robust chart-sharing backend with MongoDB, featuring SHA-256 hash duplication detection and short URLs to optimize database storage.
- Integrated a fully functional, SEO-friendly dynamic blog system leveraging Sanity CMS.

Featured Web Projects

BreatheSafeAI | AI Risk Intelligence Dashboard | MERN Stack, Python, FastAPI

- Global Recognition:** Collaborated within a team of 5 to develop a solution selected as a Top 25 Global Finalist (out of 1000+ entries) in the Indradhanu International Grand Challenge 2025.
- Integrated a FastAPI ML model to predict asthma risks based on real-time climate and environmental data anomalies.

Printly | Smart QR-Based Print Management System | Electron, React, Node.js, Express, MongoDB

- Architected a hybrid Next.js + Electron 'Scan & Print' ecosystem designed to handle print orders, job tracking, and shop workflow automation.
- Successfully reduced customer wait times by ~80% by supporting the frontend with a MERN backend, using Redis for heavy job queuing and WebSockets for real-time desktop synchronization.

Pulse | Advanced AI Chat Platform | Next.js, TypeScript, Convex, LiveKit, Gemini 2.0 Flash

- Architected a high-fidelity, real-time chat application featuring AI smart replies, real-time video/audio calling via LiveKit, and audio transcriptions.
- Utilized AI-assisted coding tools (Antigravity/Gemini 3.1 Pro) to rapidly develop and deploy a premium glassmorphic UI with Dockerized backend support.

Roborashtra 2K26 | Official Event Portal | Next.js, TypeScript, Tailwind CSS

- Engineered the official web portal for a national-level robotics event, delivering a high-performance, SEO-friendly user interface.
- Designed a responsive layout in collaboration with a cross-functional team, optimizing media delivery and event accessibility.

Education

Pimpri Chinchwad College of Engineering and Research (PCCOER)

Pune, Maharashtra

B.E. in Computer Engineering | CGPA: 9.34 (SE Ongoing)

Sept. 2024 – Present

Nashik Presidency School & Jr. College

Nashik, Maharashtra

Higher Secondary Certificate (HSC) | Score: 79.83%

2024

K. Narkhede Vidyalaya

Nashik, Maharashtra

Secondary School Certificate (SSC) | Score: 92.80%

2022
